CAR PLAY SOURCE UNIT

CP-650

ISO 2-DIN DIGITAL MEDIA CAR STEREO W/ APPLE CARPLAY, BLUETOOTH CONNECTIVITY, & 6.5" LCD

CarPlay is a smarter, safer way to use your iPhone in the car. CarPlay takes the things you want to do with your iPhone while driving and puts them right on your car stereo display. You can get directions, make calls, send and receive messages, and listen to music, all in a way that allows you to stay focused on the road. Just connect your iPhone and go. CarPlay supports other apps on your iPhone — like your favorite audio, messaging, and voice apps. You can personalize your experience by rearranging exactly how your apps appear in CarPlay through settings on your iPhone.

SIRI HANDS-FREE

CarPlay features Siri voice control and is specially designed for driving scenarios. CarPlay also works with your car's controls — knobs, buttons, touchpad, or touchscreen. And the apps themselves have been reimagined for the car, so you can use them while your eyes and hands stay where they belong. Make calls, return missed calls, and listen to voice-mail. Siri can help you do all of these things. All you have to do is ask.

MAPS

The power and simplicity of Apple Maps is now available on your dashboard. CarPlay can predict where you most likely want to go using addresses from your email, texts, contacts, and calendars. You can also search along your route for nearby gas stations, restaurants, coffee shops, and more. Or just use your voice: "Siri, where's the closest EV charging station?" And CarPlay doesn't just guide you, it helps get you there safely by advising which lane to be in to make a turn, and showing the speed limit.

MUSIC

Access all of your content from iTunes, your Apple Music membership, and additional audio apps using CarPlay's built-in controls. Search by artist, album, or song. See what's playing and what's up next. You can ask Siri to play your favorite song or be your personal DJ.

MESSAGES

Reading and writing is now listening and dictating. Siri can send, read, and reply to your text messages for you, so you never have to look at your iPhone while driving. Just say: "Siri, tell Blair I'll be there in 20 minutes," and it's done. CarPlay plays audio messages too, so you can hear from people in their own voices.

CarPlay is compatible with these iPhone models:

iPhone XS	iPhone 8	iPhone 6s	iPhone SE
iPhone XS Max	iPhone 8 Plus	iPhone 6s Plus	iPhone 5s
iPhone XR	iPhone 7	iPhone 6	iPhone 5c
iPhone X	iPhone 7 Plus	iPhone 6 Plus	iPhone 5

PowerAcoustik multimedia source units feature built-in bluetooth technology, allowing the safe integration of smartphones and other devices into the car audio system. A2DP and AVRCP profiles allow for wireless audio streaming from the mobile device to the car stereo. Select media players and 3rd party apps can be controlled from the receivers touchscreen, while enjoying quality sound from the car audio system. Phone calls can be accepted or rejected via the receivers on-screen interface, using most Bluetooth enabled mobile phones. If allowed, contacts lists and call logs are transferred to the receiver for easy recall.

PowerAcoustik DVD drives playback traditional DVD movies, as well as MP4 and Xvid/Divx video files from DVD-R discs. CD-only products playback traditional CD's, as well as mp3 and WMA audio files from CD-R discs.

SD and Micro SD card reader port connection for your compatible memory cards with mp3 and MVA audio. Will playback video files of AVI, MP4 and Xvid/Divx files.

PowerAcoustik receivers feature USB ports and Auxiliary (3.5mm) audio input, some on the front panel for easy connection. Playback MP3 audio and MP4 video from a USB flash drive, or pass audio from external media players to the car audio system via AUX input.

All PowerAcoustik receivers with a color LCD include a composite RCA input for a universal back-up camera, making the vehicles blind spot(s) visible. Select products include an on-screen distance gauge showing an estimated distance to objects.

A capacitive touch panel with SmartSense sophisticated sensors pinpoint the location of your finger by absorbing the conductivity on the surface of your skin. Crystal-clear glass surface improves image quality, enhancing the viewing experience.

Glare-resistant resistive touch panels use traditional physical connections between conductive polycarbonate membranes to execute control commands.

Select multimedia source units include an 8 or 10-band graphic equalizer. Users can tune the audio to their tastes by increasing or decreasing the level of the various frequencies. Several pre-set genre EQs are included.

All PowerAcoustik multimedia source units include front & rear audio outputs, while select products include a dedicated subwoofer RCA output. Source units featuring DVD or digital video playback include a composite video output to connect to other in-car entertainment devices.

Offering 7 color combinations, the RGB feature allows the user to customize the color illumination for buttons and other faceplate accents. Match the receiver's illumination to the vehicles interior lighting, or create a color to fit any mood.

Each PowerAcoustik head unit features a Class A/B integrated circuit audio amplifier built-in. It's 75 watts peak power is sufficient for most factory car speakers. sound staging options include balance, fade, and a bass & treble level adjustment.

MobileLink enabled in-car entertainment products offer full mirroring between smartphones and tablets. Safely share videos, pictures, and all other content on your mobile device with passengers. Requires MHL HDMI interface cable, sold separate.

PowerAcoustik ceiling-mounted & seat headrest in-car entertainment products have infrared wireless audio transmitters built-in. Match available single or dual channel wireless headphones to the entertainment device.

Select ceiling mounted & seat headrest in-car entertainment products include a multi-channel low energy FM radio transmitter. When it, the car receiver can be tuned to pick-up the video's audio track & play thru the car audio system.

Select ceiling mounted & seat headrest in-car entertainment products have composite RCA audio & video inputs to display video playback from external multimedia sources.

DRIVER

AWARENESS

LP-4CS - REAR VIEW EYES

LICENSE PLATE FRAME W/ NIGHT VISION CAMERA, BACK-UP SENSORS, ON-SCREEN DISTANCE GAUGE, & PROXIMITY ALERTS

BACK-UP CAMERA

The 1/4" CCD color camera of Rear View Eyes offers a glimpse into the estimated 260 square feet of blind spot behind your vehicle, reducing it by up to 90%. Eight built-in infra-red night vision LEDs shed artificial light onto the surroundings, even in the darkest driving conditions. Simply connect the camera's output to most aftermarket car stereos with an LCD, or a dash mounted monitor via RCA connector. An on-screen distance guide gives the estimated distance to an object or driving space visible in the camera image.

OBJECT PROXIMITY SENSORS

Three built-in ultra-sonic proximity sensors always monitor how close you are to objects. Strategically aimed, the proximity sensors offer nearly 180° of observation. An on-screen distance indicator & optional speaker giving audible alert tones indicate how close the vehicle is to approaching objects.

GENERAL INFORMATION

Fits All USA Auto License Plates
IP67 Waterproof Housing

DRIVER

AWARENESS

DVALT

DISTRACTED DRIVER ASSISTANT SYSTEM W/ LANE DEPARTURE & FORWARD COLLISION WARNING

Driving distracted is the greatest behind the wheel safety concern. Whether it's our first-time drivers, parents reaching their golden years, or even you yourself, everyone needs a little reassurance. The #1 cause of traffic accidents is not driving under the influence, or even speeding. 90% of all traffic accidents are caused by distracted driving. Reducing these statistics is the primary reason why Drive Alert was developed. Drive Alert is perfect for anyone spending long hours behind the wheel, drives professionally, and any of us who are susceptible to distracted driving.

Drive Alert improves responsible driving by alerting the driver in two ways:

LANE DEPARTURE WARNING SYSTEM (LDWS)

Drive Alert's LDW system uses an advanced camera sensor algorithm to detect lane markings and warn the driver when merging out of the traffic lane. Regardless if the merge was intended, Drive Alert is always watching

FORWARD COLLISION WARNING SYSTEM (FCWS)

Drive Alert's FCW system calculates the time to impact of an object in front of the vehicle, considering the traveling speed. If the calculated time to impact is less than the stopping capability of the vehicle, Drive Alert will warn the driver in attempt to prevent the collision.

LDW & FCW system sensors always watching the road, alerting you of trouble ahead

Improve driver awareness, reduce the #1 cause of traffic accidents

Black Box Audio & Video Recording

In the event of an incident, Drive Alert's built-in black box feature records video of the vehicle surroundings, as well as voice recording of the vehicle interior. In the event of a collision, Drive Alert's built-in G-force shock sensor flags and isolates these recordings for quick recall. Thanks to a built-in battery, Drive Alert's G-force sensor will activate recording even if the vehicle is not running.

Drive Alert offers some of the most advanced safety features available today. These features are designed to reduce the risk of being involved in an accident, however, ultimate responsibility of safe driving remains on the driver of the vehicle.

RAZOR AMPLIFIERS

Cars come in all different shapes, most in the same size; compact. So, we've engineered these mini razor amps to fit in virtually any location in your ride. Other sport compact amplifiers use bizarre technologies with pseudo power supplies. Razor amps use tried and tested mosfet power supplies & tenacious class d circuitry.

Dash Mount Gain Control Included

High Efficiency Class D Full Range & Monoblock Amplifiers
Compact 4.75" Chassis Design for Installation Versatility
MOSFET Power Supply w/ Audiophile Grade IRTM Transistors
Military Grade SMT PCB Maintains Dynamic Performance
2-ohm Stereo & 4-ohm Bridged Full Range Operation
1-ohm Stable Monoblock Operation for MAX Power (3500D)
Die-Cast Aluminum Alloy Heatsink for Optimum Dissipation
Direct Short, Thermal, & Overload Circuits Protect Amplifier

Variable 12dB High Pass, Low Pass, & Subsonic Crossovers
200mV-6V Low Level RCA Inputs
4g Power Wire & 8g Speaker Wire Outputs
High Level Input w/ Signal Sense Auto Turn-on

OVERDRIVE AMPLIFIERS

We're in a time where small is "in". Smaller, more economical vehicles are more and more desirable. But that doesn't mean you have to sacrifice big power for your system. Overdrive amplifiers pack huge amounts of power into small chassis thanks to efficient full-range class d topology and smt technology. Complimented with every possible preamp adjustment, overdrive amplifiers leave nothing to be desired...

mofo SUBWOOFER

MOFO X subwoofers are refined and increase efficiency dramatically! MOFO-X subs use a composite sandwich cone with a polypropylene surface for durability and Spruce pulp backing for smooth low bass. Like the original MOFOs, the new models still use an aluminum dustcap that couples to the voice coil former and extends over the cone. Why? The fins brace the cone and eliminate cone flex during high excursion. And since they are aluminum and couple to the voice coil, they act as a heatsink or heat extractor. Using the latest materials, the new MOFO subs yield superior performance. Cast aluminum baskets? Of course! Increased bottom octave output? You Bet! Louder than the original design? Duh!!

mofo TYPE S SUBWOOFER

MOFO Type S subwoofers are engineered to offer all the reliable performance qualities you expect of the original MOFO. Of course a new generation MOFO wouldn't be without including the proven benefits and characteristics of the original; aluminum alloy voice coil heatsink dust cap, 2.5" dual voice coil, dual damper suspension, high density reinforced paper cone, etc. Everything you expect from MOFO. What makes Type S MOFO different than the original? One of the two mods to Type S should be easy to spot. Type S uses formed steel framework, while the original uses a more expensive aluminum frame to support its overcompensating motor structure. The second mod to Type S is a motor structure that's been optimized for an efficient use of its magnetic strength. Strategically targeting all the motor structures power gives Type S MOFO the dynamic sound & performance qualities of its big brother, without the need of unnecessarily massive magnets. These improvements to MOFO Type S reduces material cost while maintaining the design & performance characteristics you want of the original.

BAMF

SUBWOOFER

BAMF subwoofers are the newest secret weapon for you bass BURP fanatics! These beasts are engineered for the most extreme conditions. Massive 3" 4-layer voice coils built on an aluminum former can take the heat. Freakishly oversized motor structures provide more magnetic inertia than is ever necessary for a woofer. Spruce tree pulp cones, high density extended excursion foam surround, and hybrid suspension dampers work together to contain the momentum to a shattering roar...

Fahrenheit

4,000K color temperature simulates brilliant white daytime sunlight characteristics

Active COB LED matrix engineered using industry-leading optical illumination analysis software

360° rotational adjustment & length regulator to focus light beam for optimal light dissipation

Built-in Can-Bus/ECM control interfaces automatically program to any vehicle configuration

OEM standard electrical connectors & chassis bracket configurations ensure exact vehicle fitment

LED HIGH PERFORMANCE HEADLIGHTS

SELECT

4,000 lumen emitting diode capable of generating up to 4X the light of typical halogen headlamp

5,000hr/3-5 years expected lifetime, surpassing 2-3 year lifespan of typical halogen headlamp

4,000K color temperature simulates brilliant white daytime sunlight characteristics

Active COB LED matrix engineered using industry-leading optical illumination analysis software

Superconductive ceramic circuit panel and aluminum alloy chassis resist heat build-up

OEM standard electrical connectors & chassis bracket configurations ensure exact vehicle fitment

External Can-Bus/ECM control interfaces automatically program to any vehicle configuration
